PURPOSE

Illinois' first Trapper Education courses were held in 1983. In 1985, the successful completion of a Trapper Education course sponsored by the Department of Natural Resources became mandatory for all first-time trappers under the age of 18. This manual is designed for use by students and instructors of Trapper Education courses, but it is available to anyone with an interest in traps, trapping and furbearer management. Our goal is to provide a solid foundation for trapping animals responsibly, legally and successfully.
